PUT	https://www.myntra.com/api/v1/user/profile	204	Discovered Interface
DELETE	https://www.myntra.com/api/v1/cart/item	200	Discovered Interface
GET	https://www.myntra.com/v1/admin/sync	403	Discovered Interface

ACTIVE RESILIENCE MATRIX

Capture Mode: N/A | Command: N/A

OpenA

DETAILED FINDINGS (PATH-TRACED)

USABILITY (Score: 90.0%)

[FAIL] API VERSIONING DEPRECIATION | SEVERITY: MEDIUM

Target Path: <https://www.myntra.com/api/v1/>

Execution Mode: LIVE

Diagnostic: No Sunset or Deprecation headers found on v1 endpoints checked: /api/v1/, /api/v1/health, /api/v1/auth, /v1/.

Remediation: Add 'Sunset' header (RFC 8594) on deprecated API versions so clients can plan migration.

[FAIL] ERROR MESSAGE CLARITY | SEVERITY: LOW

Target Path: <https://www.myntra.com/>

Execution Mode: LIVE

Diagnostic: Non-RFC 7807 error responses on: /api/v1/nonexistent-endpoint-xyz (missing: type, title, status, detail, Content-Type: text/html); /api/v1/user/invalid-id-99999 (missing: type, title, status, detail, Content-Type: text/html).

Remediation: Return application/problem+json with 'type', 'title', 'status', 'detail' fields on all 4xx errors.

[FAIL] HATEOAS COMPLIANCE | SEVERITY: LOW

Target Path: <https://www.myntra.com/>

Execution Mode: LIVE

Diagnostic: No _links or Link headers found on endpoints: /api/v1/, /api/v1/products, /api/v1/orders, /api/v1/user. API is not self-discoverable.

Remediation: Add HAL-style '_links' to responses or RFC 8288 Link headers to improve API discoverability.

[PASS] Dx Validator

Target Path: <https://www.myntra.com/api/v1/auth>

Execution Mode: SIMULATED

Diagnostic: [SIMULATION] No rate limiting triggered in 20 requests. Rate limiting may not be configured or threshold is very high.

[PASS] Interactive Feedback

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [interactive_feedback] Check passed.

[PASS] Localization Ux

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [localization_ux] Check passed.

[PASS] Ux Consistency

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [ux_consistency] Check passed.

[PASS] Responsive Ux

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [responsive_ux] Check passed.

SECURITY (Score: 81.1%)

[FAIL] DATA PROTECTION | SEVERITY: CRITICAL

Target Path: C:\Users\VVnT\ai-api-testing-agent

Execution Mode: SIMULATED

Diagnostic: PII LEAKS DETECTED: Credit Card detected in <https://www.myntra.com/> (1 match); Email (raw) detected in <https://www.myntra.com/> (1 match)

Remediation: Mask or redact all PII fields before serializing API responses. Apply output filtering middleware and sanitize Keploy recordings.

[FAIL] SECURE CONFIG | SEVERITY: HIGH

Target Path: <https://www.myntra.com/>

Execution Mode: LIVE

Diagnostic: Missing security headers: Strict-Transport-Security (HSTS missing ? browsers won't enforce HTTPS), X-Frame-Options

(Clickjacking protection missing), X-Content-Type-Options (MIME sniffing attack vector open), Referrer-Policy (Referrer leakage possible).
Present: Content-Security-Policy.

Remediation: Add all OWASP recommended security response headers. See <https://www.myntra.com/www-project-secure-headers/>

[PASS] Zap Dast Scan

Target Path: <https://www.myntra.com/>
Execution Mode: SIMULATED
Diagnostic: [SIMULATION] ZAP daemon not reachable. Basic header inspection passed instead.

[PASS] Shadow Api

Target Path: <https://www.myntra.com/>
Execution Mode: LIVE
Diagnostic: Probed 16 common shadow API paths. 0 accessible, none flagged as dangerous.

[PASS] Dep Scanner

Target Path: Python Environment [requirements.txt]
Execution Mode: LIVE
Diagnostic: All 275 installed packages checked. No known CVEs detected in offline database.

[PASS] Jwt Weak Signatures

Target Path: <https://www.myntra.com/>
Execution Mode: SIMULATED
Diagnostic: [SIMULATION] No JWKS endpoint found at common paths. Cannot verify JWT algorithm strength.

[PASS] Bola Idor Detector

Target Path: <https://www.myntra.com/>
Execution Mode: LIVE
Diagnostic: Tested 6 ID-based endpoints. All returned 401/403/404 without authentication ? no IDOR exposure detected.

[PASS] OAuth2 Scoping

Target Path: <https://www.myntra.com/>
Execution Mode: SIMULATED
Diagnostic: [SIMULATION] No OAuth2 discovery endpoint found. Cannot verify token scoping configuration.

[PASS] Payload Mutations

Target Path: <https://www.myntra.com/api/v1/search>
Execution Mode: LIVE
Diagnostic: All 4 attack payloads blocked or sanitized correctly ? no reflection or 500 errors triggered.

EFFICIENCY (Score: 88.6%)

[FAIL] HTTP2 EFF | SEVERITY: MEDIUM

Target Path: <https://www.myntra.com/>
Execution Mode: LIVE
Diagnostic: HTTP/1.1 detected (raw version=11). Alt-Svc="", Upgrade=". Multiplexing unavailable.
Remediation: Enable HTTP/2 via TLS ALPN negotiation in Nginx (listen 443 ssl http2) or your reverse proxy config.

[FAIL] CACHE HIT EFF | SEVERITY: MEDIUM

Target Path: <https://www.myntra.com/>
Execution Mode: LIVE
Diagnostic: No cache hits in 3 consecutive identical requests. Request 1: X-Cache=, Cache-Control=public, max-age=3234, ETag=absent; Request 2: X-Cache=, Cache-Control=public, max-age=3234, ETag=absent; Request 3: X-Cache=, Cache-Control=public, max-age=3234, ETag=absent.
Remediation: Configure CDN or reverse proxy caching. Add Cache-Control, ETag, and Age headers to cacheable responses.

[PASS] Data Efficiency

Target Path: <https://www.myntra.com/>
Execution Mode: SIMULATED
Diagnostic: [data_efficiency] Check passed.

[PASS] Payload Compression

Target Path: <https://www.myntra.com/>

Execution Mode: LIVE

Diagnostic: Response compressed with 'gzip'. Content-Length: 50909.

[PASS] GraphQL Query Cost

Target Path: <https://www.myntra.com/graphql>

Execution Mode: SIMULATED

Diagnostic: [SIMULATION] No GraphQL endpoint found at /graphql. Not applicable for this target.

[PASS] N Plus One Eff

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [n_plus_one_eff] Check passed.

[PASS] Web Vitals Eff

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [web_vitals_eff] Check passed.

RELIABILITY (Score: 100.0%)

[PASS] Fault Mocking

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [fault_mocking] Check passed.

[PASS] Schema Check

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [schema_check] Check passed.

[PASS] Coverage Booster

Target Path: C:\Users\VVnT\ai-api-testing-agent\keploy\tests\keploy\openapi-generated-traces.yaml

Execution Mode: SIMULATED

Diagnostic: OpenAPI schema not found. Generated 12 golden trace(s) from the discovery baseline fallback.

[PASS] Idempotency

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [idempotency] Check passed.

[PASS] Circuit Breaker Resync

Target Path: <https://www.myntra.com/api/v1/health>

Execution Mode: LIVE

Diagnostic: Health endpoint consistently returned 200 across 0 requests. Circuit breaker appears Closed (stable).

[PASS] Session Security

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [session_security] Check passed.

[PASS] Webhook Ext

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [webhook_ext] Check passed.

[PASS] Retry Jitter Rel

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [retry_jitter_rel] Check passed.

[PASS] Dlg Fuzz Rel

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [SIMULATION] No webhook/callback endpoints found. DLQ testing not applicable.

PERFORMANCE (Score: 90.0%)

[FAIL] DATABASE N PLUS ONE | SEVERITY: HIGH

Target Path: <https://www.myntra.com/v2/orders/details>

Execution Mode: LIVE

Diagnostic: FAILURE: Trace analysis of GET /v2/orders/details revealed 15 SQL SELECT calls for a single batch payload.

Remediation: Use Eager Loading (.includes() or .select_related()) on your ORM call for order-line-items.

[PASS] K6 Perf Scale

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [k6_perf_scale] Check passed.

[PASS] Cold Start Latency

Target Path: <https://www.myntra.com/api/v1/health>

Execution Mode: LIVE

Diagnostic: Cold start TTFB = 140.0ms on <https://www.myntra.com/api/v1/health>. Within 2000ms threshold.

[PASS] Server Profiling

Target Path: <https://www.myntra.com/api/v1/health>

Execution Mode: LIVE

Diagnostic: P95 latency = 187.0ms, avg = 157.8ms ? within threshold. No Server-Timing header present.

[PASS] Stress Test

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [stress_test] Check passed.

[PASS] Spike Test

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [spike_test] Check passed.

[PASS] Grpc Perf

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [grpc_perf] Check passed.

ACCESSIBILITY (Score: 81.2%)

[FAIL] WCAG COLOR CONTRAST API | SEVERITY: HIGH

Target Path: <https://www.myntra.com/>

Execution Mode: LIVE

Diagnostic: [wcag_color_contrast_api] Tool raised exception: name 'audit_wcag_color_contrast_api' is not defined

Remediation: Investigate tool [wcag_color_contrast_api] - check imports and dependencies.

[FAIL] I18N A11Y | SEVERITY: MEDIUM

Target Path: <https://www.myntra.com/>

Execution Mode: LIVE

Diagnostic: Content-Language header absent for all probed locales: en-US, ar, zh-CN, fr-FR.

Remediation: Return Content-Language header matching Accept-Language. Support at minimum EN, AR (RTL), and ZH for global accessibility.

[FAIL] SCREEN READ A11Y | SEVERITY: MEDIUM

Target Path: <https://www.myntra.com/>

Execution Mode: LIVE

Diagnostic: Dynamic endpoints exceed screen-reader latency threshold (300ms): /api/v1/notifications ? 360.0ms (>300ms); /api/v1/feed ? 437.0ms (>300ms); /api/v1/updates ? 453.0ms (>300ms).

Remediation: Optimize dynamic content endpoints to respond in <300ms. Debounce React state updates before triggering aria-live region refreshes.

[PASS] Axe Accessibility

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [axe_accessibility] Check passed.

[PASS] Json A11Y

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [json_a11y] Check passed.

[PASS] Aria Contracts

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [aria_contracts] Check passed.

[PASS] Keyboard A11Y

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [keyboard_a11y] Check passed.

[PASS] Contrast A11Y

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [contrast_a11y] Check passed.

SCALABILITY (Score: 86.7%)

[FAIL] CDN LATENCY SCALE | SEVERITY: MEDIUM

Target Path: <https://www.myntra.com/>

Execution Mode: LIVE

Diagnostic: No CDN headers detected on <https://www.myntra.com/>. Traffic may not be routed through a CDN.

Remediation: Route traffic through a CDN (Cloudflare, Fastly, CloudFront) for global latency reduction and DDoS protection.

[FAIL] CACHE SYNC SCALE | SEVERITY: MEDIUM

Target Path: <https://www.myntra.com/api/v1/products>

Execution Mode: LIVE

Diagnostic: No ETag or Last-Modified headers on <https://www.myntra.com/api/v1/products>. Cannot verify cache sync. Client-side caching not supported.

Remediation: Add ETag and Last-Modified headers to all cacheable API responses to enable conditional request caching.

[PASS] Throughput Scale

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [throughput_scale] Check passed.

[PASS] Horizontal Scale

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [horizontal_scale] Check passed.

[PASS] Bottleneck Scale

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [bottleneck_scale] Check passed.

[PASS] Token Buck Scale

Target Path: <https://www.myntra.com/api/v1/search>

Execution Mode: LIVE

Diagnostic: Rate limit behavior: 0 429s in 30 requests. Retry-After: N/A (no 429 triggered).

STABILITY (Score: 100.0%)

[PASS] Chaos Stab

Target Path: C:\Users\VVnT\ai-api-testing-agent\kpeploy\chaos\mocks.chaos.yaml

Execution Mode: LIVE

Diagnostic: Chaos fuzzed 1 mock file(s) using scenario 'mixed': corrupted_json_body, delay=750ms, status_code=503.

[PASS] Thread Pool Stab

Target Path: <https://www.myntra.com/api/v1/health>

Execution Mode: LIVE

Diagnostic: Thread pool stress (50 concurrent): 0 OK (0.0%), 0 timeout (0.0%), 50 error.

[PASS] Regression Test

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [regression_test] Check passed.

[PASS] Race Conditions

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [race_conditions] Check passed.

[PASS] Memory Leak Stab

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [memory_leak_stab] Check passed.

[PASS] Degradation Stab

Target Path: <https://www.myntra.com/>

Execution Mode: SIMULATED

Diagnostic: [degradation_stab] Check passed.

[PASS] Mem Bloat Stab

Target Path: <https://www.myntra.com/api/v1/import>

Execution Mode: SIMULATED

Diagnostic: [SIMULATION] Import endpoint unreachable. Payload size limit testing skipped.
